Celebrating 25 years of innovation!

Starting out from our first small rental space in Pasadena with one part-time office staff and a shipping/receiving clerk, we have evolved into an outsized pottery operation on three acres, supplying quality ceramics to local and out-of-state nurseries, landscapers, designers, and hospitality customers.

Today, as for the past 25 years we nurture innovation, creativity and workmanship. Working with small ceramic factories in Asia we develop extraordinary products that inspire design professionals and home owners alike.

From contemporary colors such as gunmetal, bronze and metallic gold to new lightweight materials like clayfibre, we take inspiration from worldwide trends to bring new materials, colors and fresh designs to the marketplace.

Asian Ceramics is proud to be associated with beautiful planters, innovative designs and handcrafted quality pottery.

We invite you to visit our large pottery yard in the San Gabriel valley or enjoy our entire collection at www.asian-ceramics.com

Traditional craftsmanship is used to create these pots and guarantee that no two are alike. Uneven glazing and variations in color and texture are part of their inherent beauty.

Yixing, located in the southern part of China’s Jiangsu province, is the world’s only source of Zisha, also known as “purple clay.” With high iron content and no lead, this reddish brown stoneware is used in the production of Zisha or Yixing teapots. Known for their high durability and aesthetic shapes, they were originally created during the Song Dynasty in the 10th century. Asian Ceramics features a large assortment of both modern and traditional Zisha garden bowls, pots, and planters.

Naturally dark coarse clay is intrinsic to the appeal of these pots from China. Unfiltered clay creates a rough surface, adding dimension and texture to your garden design.

Rustic green, brown, red and yellow vessels are made by coiling in age-old Chinese workshops. All colors are applied by hand and then fired in traditional wood-fired kilns for several days. Glazes melt on the pots and vitrify, producing a beautiful glossy, glass-like finish, in a striking variety of color gradations.

Handmade in Thailand, these pots are built by the coiling method whereby clay spirals upwards until the desired form is achieved. Once fully formed and joined, they are imprinted with a waffle surfaced wooden paddle, giving each piece its own unique finish.

Modern and fluid, the hefty weight and thick base of each piece offers stunning options for adding elegance and color. Hand made in Europe with tinted glass, these pots are perfect for orchids and arrangements.
Our egg-shaped planters are produced in one of China's important ceramic production centers, blending old traditions with modern aesthetics. They are offered in a variety of beautiful colors including modern glazes such as tropical green and orange.

Deceptively lightweight, clayfibre is a mixture of natural materials and fiberglass added for reinforcement. Carrying the weathered look of concrete without the weight, these garden pots and planters have a contemporary aesthetic. Naturally retained salts will ensure an organic aging of the containers.
